JOBSITE SERIES™ PERRY STYLE GUARDRAIL SYSTEM

The Metaltech interior scaffolding guardrail is an indispensable safety measure for fall prevention and worker protection.

Composed of solid, horizontal and vertical steel bars, it is securely installed on the coupling pins of the Baker.

When you are not using your scaffolding at the top-level, you can clamp the side rail of your guardrail system directly on the two side ladders of your Baker – creating a safe environment for the worker.

Our railings are also equipped with a wooden toe board to prevent objects from falling off the platform.
