MEETS

BUILT TOUGH FOR
SAFETY

Our scaffolding stage platforms (one-person or two-person) represent an efficient and secure solution when working on an exterior building facade. Available in various dimensions ranging from 12 feet to 24 feet long, these work platforms can be quickly installed on the Pump Jack, Ultra-Jack® and Ladder Jack scaffolding system.

Made of aluminum with an anti-slip finish, the planks combine lightness, durability, and resistance to weather conditions. Additionally, they are easy to transport thanks to their ergonomic carrying handles.

ONE-PERSON SCAFFOLDING STAGE

- ALUMINUM
- 250 LB LOAD CAPACITY

MODEL	DIMENSIONS (W X L)	WEIGHT	UPC
M-SPA11212	12" X 12'	39.41 LB (17.88 KG)	778300008247
M-SPA11216	12" X 16'	51.54 LB (23.37 KG)	778300008254

GUARDRAIL SYSTEMS

It is possible to install a guardrail system on the stages to significantly enhance the safety of workers on jobsites. Different models, lengths and accessories are available. Safety standards recommend using a 3-side and/or 4-side guardrail system.

1-SIDE

2-SIDE

3-SIDE

4-SIDE

NESTABLE STAGES

Nestable handles enable planks to interlock, effectively eliminating tripping hazards and gaps, thus creating safe walkways and work platforms. They are available for two-person scaffolding planks that are 20' & 24' feet long and 6" in high.
