Secure your job site perimeters effortlessly with our durable and reliable framed 6' temporary fence panels. Designed and welded locally (in Canada), our 12-gauge, galvanized, steel wire mesh is 50% lighter than 6-gauge wire mesh. Easy and quick one-man installation, the panels are joined together with double clamps or by hook system.

Featuring our innovative reinforcing VBEND technology, these panels offer added stability, sturdiness, and safety, making them ideal for any project.

Ensuring optimal longevity, our modern steel panels are superior to competitive choices such as chain link fences.

DESCRIPTION	DIMENSIONS (H X W)	WEIGHT	MODELS	QTY/PALLET	WEIGHT/PALLET
6'4" PROTEC PLUS LIGHTGUARD SAFERSTACK*	76 X 90 5/16 IN.	28.4 LB (12.9 KG)	CT-TFP7696PLUSLD	60	2,561 LB (1,164 KG)
